## **DETAILED ACTION**

### ***Drawings***

1. Figures 5 and 6 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites the limitation "the kind of workpiece" in lines 15-16. There is insufficient antecedent basis for this limitation in the claim.

### ***Claim Rejections - 35 USC § 102***

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Art Unit: 3724

5. Claims 1-3 and 5 are rejected under 35 U.S.C. 102(b) as being anticipated by Chun (5,522,295).

Regarding claim 1, note plurality of upper molds 88; plurality of lower molds 92; workpiece W; upper turret 82; lower turret 84; motors 96, 98; controller in column 5, line 2; upper and lower molds corresponding in column 5, lines 53-54.

Regarding claim 2, note selected one of upper molds and different clearances column 5, lines 55-57.

Regarding claim 3, first motor 98; second motor 96.

Regarding claim 5, note method in columns 3 through 4, lines 57 through 21. Also note, columns 7 through 8, lines 7 through 11.

***Claim Rejections - 35 USC § 103***

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claim 4 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chun in view of Bollaert (1,704,962). Chun discloses everything as noted above, but does not disclose a notch. However, Bollaert teaches a notch 68. It would have been obvious to provide a notch in Chun as taught by Chun in order for the operator to see the point of the punch and confirm the positioning of the punch upon the material to be punched. Note column 5, lines 4-10.

Art Unit: 3724

***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Gallant et al, Ichimura et al and Maynard et al are cited for notches; Aizawa, Ostini, Seto et al, Seto and Hayashi are cited for similar structure and method.
